

1623 Farnam is the leading network interconnect point providing secure direct edge connectivity to fiber and wireless network providers, major cloud, content providers and Fortune 500 enterprises. Our Omaha Interconnected Edge Data Center supports mission critical infrastructure and applications with the highest levels of availability.

Experience You Can Trust.

We have brought unmatched connectivity to our customers for over 20 years. With an Executive Team that collectively has over 60 years of industry experience, we are able to confidently deliver whatever your business needs. With our highly connected edge data center, extremely reliable network power grid and our team of experts, you can be sure that your business is in good hands.

Your Go To Cloud On-Ramp.

Thanks to our strategic location in the heart of the US and our growing partnerships with Google Cloud Connect, Megaport, Telia, and other popular cloud enablers, you can quickly and privately connect to the cloud providers you need. If your business has data-intensive workloads, spans multiple locations throughout the US and is designed to run in the public cloud, it's time to take advantage of the reliability, agility and scalability of interconnecting at 1623 Farnam.

Dedicated Peering with Omaha IX.

1623 Farnam is the host of Omaha IX, a dedicated centrally-located peering platform that allows you to connect effectively in a way that won't break the bank. Since our facility is located in the heart of the US, becoming a member of Omaha IX puts you right in the center; equidistant from each coast and the associated hubs for major content providers. This allows you to securely exchange traffic and route directly with others in the exchange, without incurring extremely high costs!

Why 1623 Farnam?

Our prime location Omaha, Nebraska puts us in the center of the nation, making us the interconnection point for the country's largest carrier's east/west and north/south routes. Our carrier neutral edge data center is The Center of secure onramps to the world's biggest cloud providers. Our highly connected facility is the nexus point between hyperscale cloud providers, carriers, and other managed services providers with access to 50 network companies that have local, regional, national and international reach.

Quick Facts:

Carrier Dense – over 50 carriers with local, national and international reach for primary or redundant circuits

Carrier Neutral – choose the carrier that best meets your requirements

Internet Bandwidth – major providers of Wholesale Internet Bandwidth

Higher Network Performance & Flexibility

Organized "Meet-Me-Room" – facilitates fast and easy cross connects

Omaha IX Exchange (OmahaIX.com) – and other peering partners

Low Latency Access – "on-net" and available from both facilities
